### **DETAILED ACTION**

1. This action is responsive to papers filed on April 27, 2007.

#### ***Response to Amendment***

2. In response to applicant's amendment received on April 27, 2007, all requested changes to the specification and claims have been entered.

#### ***Allowable Subject Matter***

3. Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

4. As to claims 1 and 12, none of the prior art teach or fairly suggests the limitation of "determining for each  $n,m$  a local mean calculated on a neighborhood about a pixel of coordinates  $n,m$  of the starting image, obtaining a first filtered image", in combination with the other limitations of the claims. The prior art found in the article entitled "The First Order, Absolute Moment in Low-Level Image Processing" to Demi et al., already of record, discloses detecting and tracking the contour of a starting image including a process for filtering the starting image through an absolute central moment, see section 2. However, Demi et al. does not teach that during the process of filtering an image through an absolute central moment, determining for

each  $n,m$  a local mean calculated on a neighborhood about a pixel of coordinates  $n,m$  of the starting image, obtaining a first filtered image, as disclosed in the limitations of claims 1 and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
